- Git
- Figma
- Project Management

EXPERIENCE

Providence Health and Services (January 2023 – May 2023)

Software Developer Intern

- Designed and coded a desktop and mobile application for 3D volumetric videos
- Managed version control using Github
- Exported and compiled projects using Webpack
- Used multiple IDEs to work on a team with different skillsets, worked with designers on 8th Wall and developers in Visual Studio Code
- Created and edited in Adobe Premiere Pro a case study video to explain the project ([View Video](#))

Cedars-Sinai Medical Center (October 2018 – January 2023)

Clinical Research Coordinator

- Managed the execution of grant funded digital health and clinical research projects from inception to completion, including studies using mHealth Apps, Fitbits, and virtual reality.
- Developed user-centered educational videos for patients with IBD using patient focus groups and input from a multidisciplinary team, measured patient engagement through online surveys, and disseminated the videos on social media resulting in over 1 million user impressions.
- Planned the Annual Virtual Medicine Conference consistently under budget while achieving an all-time high attendance record. ([View Site](#))
- Launched the Virtual Medicine Webinar Series by creating landing pages, recording lectures with world renowned speakers, editing videos, and distributing assets through email blasts with Constant Contact, social media, and interactive features of YouTube Premiere. ([View Site](#))
- Presented actionable recommendations after completing a \$2 million Patient Centered Outcomes Research Institute (PCORI) Grant by designing a patient facing website, collaborating with stakeholders and patient partners, and designing monthly newsletters. ([View Site](#))

Cedars-Sinai Center for Outcomes Research and Education (CORE) (October 2014 – October 2018)

Research Assistant

- Collaborated with senior researchers to design studies aimed at improving patient outcomes in the fields of gastroenterology and pain management. ([View Site](#))
- Managed the calendar appointments of the Director of the CORE Research Lab.
- Led efficient and effective weekly team meetings to discuss current and pending tasks for projects.
- Interviewed and trained new lab employees.
- Recruited patients for pain management research studies using email and phone calls.
